## 72 Hour Resident Checklist

- Monitor bulletins on local television, radio stations, and Community/Installation communication channels.
- Fill or top off your vehicle's fuel tank and check battery fluid levels.
- Check batteries for radio and flashlights and your supply of candles or lantern fuel/wicks and matches.
- Secure furniture and other loose outdoor materials.
- Small boat trailers should be tied down securely with boats latched to them and filled with water.
- Put together a portable Disaster Kit.
- Obtain an adequate supply of special/prescription medicines (two weeks' worth, if possible).
- Locate the main turnoffs for electricity, water, and gas.
- Package your valuables (jewelry, important paperwork, etc.) for safe keeping in waterproof containers. Consider storing these items in a safe deposit box.
- Check your storm shutters and other protection materials for doors and windows (plywood, pressboard, fasteners, and masking tape).
- If you live alone, have an "exceptional family member", or need assistance in evacuation, make prior arrangements, arrange to travel with friends, or call your local Emergency Management Office or Police Department.
- Check with your local kennels, veterinarians, or Humane Society for safeguarding your pets and animals. Remember, public shelters do not allow pets in them with the exception of "Seeing Eye Dogs" or "Working Dogs".
